Skills

Proficient in **PHP, Laravel, FilamentPHP, Livewire, Vue.js, React.js** with experience building full-stack applications. Skilled in **Tailwind CSS, MySQL, and FilamentPHP** for responsive **UIs, APIs**, and admin panels. Experienced in **AWS Deployment**, **Payment integration (Razorpay)**, **Redis, Meilisearch, Scout, Call masking with Twilio**, provider skill verification systems, advanced location data tools, and managing database migrations and schema changes.

Experience

Sr. Web Developer | Bestkaam - Puducherry

OCT 2025 - JAN 2026

Developed the Bestkaam Laravel/Filament job portal. Key achievements include building scalable reporting (Job Seeker/Post Distribution) with advanced filtering/visualizations, integrating Meilisearch for optimized, high-performance search/faceting, designing responsive job recommendation email templates, and resolving performance bottlenecks through database query optimization. Tech: **Laravel, Filament, Laravel Scout, Redis, Meilisearch, MySQL, Tailwind CSS, Git**.

Full Stack Developer | Helprush - Srinagar

MAY 2025 - OCT 2025

I contributed to Helprush by developing service management modules and implementing provider skill verification systems. I integrated secure **Twilio** communication for call masking and built **payment** processing features using **Razorpay**. Using **Laravel** and **API** management, I ensured seamless transactions and robust provider onboarding within a user-friendly marketplace platform.

Full Stack Developer | Lailen - Aizawl

NOV 2024 - APR 2025

I contributed to full-stack web applications using **React, Vue.js, Laravel, and Quasar**. I built clean, responsive UIs with **Tailwind CSS**, integrated APIs, handled backend logic, and ensured smooth data flow for user-friendly, efficient web apps. I can build an admin panel with the help of **Filament PHP**.

Full Stack Developer | Bracketworks - Dubai

NOV 2022 - OCT 2024

Working with **React, Laravel** made applications and designed intuitive user interfaces using modern frontend technologies like React, while also handling backend integrations. I focus on delivering responsive, user-friendly web applications and ensure seamless functionality by implementing **APIs** and database operations.

Projects

BESTKAAM (bestkaam.com)

Built and optimized BESTKAAM, a high-traffic job portal using **Laravel, FilamentPHP, and Meilisearch**, delivering real-time search with faceted filtering and pagination. Engineered Analytic dashboards with dynamic data visualizations, resolved critical performance issues through **query optimization reducing load times** significantly, and designed cross-client compatible email systems.

HelpRush

Helprush is a product like Urban Company, offering an on-demand service marketplace that connects users with verified providers for home and personal services. In this project, I developed service management modules, implemented hybrid skill verification flows, integrated **Twilio** for secure communication, and built payment processing using **Razorpay** to ensure seamless and reliable transactions.

School Fee Management System

This is a multi-tenant web app built to automate fee collection for schools. I developed backend modules in Laravel for fee setup, enrollment, invoices, and discounts, and built a responsive frontend using **Vue.js, Quasar, and Tailwind CSS**, with **Sanctum** authentication, **multi-tenancy**, and dynamic form handling.

LMC Property Tax Evaluation

LMC Property Is a government project for Lunglei Municipal Corporation, Aizawl, focused on digitizing property data and tax management. I developed modules like Property Profiling, Ownership Details, Survey Data, and Tax Generation using **Laravel and FilamentPHP**, with a responsive frontend built in **Vue.js, Quasar**.

Education

B.Tech | University Institute of Engineering and Technology, CSJM University, Kanpur JULY 2015 - MAY 2019
